

What Makes NOW the Perfect Time for Wellness and Wealth?

The website mybudget360.com explains that Americans are working more hours trying to stay on track to the American Dream. But we're now at the point where the middle class is largely being squeezed out. Inflation-adjusted wages are up 20% over the last 20 years. But housing costs are up 56%. And health-care costs? They're up 155%! Housing prices alone have wiped out any gains in income.¹

Then there's unemployment. Have you heard it's around 10% in the U.S.? Well, according to shadowstats.com, when you factor in *underemployment*, the real rate as of April, 2010 was about 22% unemployment! And that number is very bad news for Americans. Back in 1935, during the worst of the Great Depression, the national rate of unemployment was 25%—a mere three points off from where it was in April, 2010.²

So much for our so-called economic recovery! The fact is, there has literally never been a better time than now to be involved in a home-based network marketing business—especially one as profitable and as personally rewarding as Wellness and Wealth!
